SECRET

SECRET,

25X1

- 3 -

10.	At about 6:30 p.m. on 10 March, a troop train loaded with about 10 x 85-mm AT guns, 30 trucks and 2 field kitchens and including 6 boxcars with enlisted men wearing red-bordered black epaulets passed through Lychen toward Fuerstenberg. The trucks each occupied by about 20 enlisted men wearing red-bordered black epaulets and carrying submachine guns left Fuerstenberg toward Neustrelitz. All soldiers were red arm bands with a red "P" in a white disk.	25X′
11,	At 5:30 p.m. on 11 March, a troop train loaded with 12 JS-3 tanks about 20 tank trucks, 30 trucks and 2 field kitchens emitting smoke, and including 8 boxcars with enlisted men passed through Lychen toward Fuerstenberg.	25X 25X
12.	At about 2 p.m. on 13 March, 25 sidecar motorcycles each occupied by three men wearing wadded jackets and partially mounting light machine guns passed through Lychen toward Templin. In the afternoon, a troop train of 8 boxcars with enlisted men wearing red-bordered black epsulets and an unidentified number of flatcars with sideracks loaded with 12 x 85-mm AT guns, about 20 trucks and 2 field kitchens passed through Lychen toward Fuerstenberg. At about 2:30 p.m. on 18 March, two sidecar motorcycles and 6 six-wheeled armored scout cars were seen travelling to the northeast on the Lychen-Prenzlau road, about 6.5 km northeast of Lychen.	25X <sup>2</sup>
13.	At about 8 a.m. on 19 March, truck with a field kitchen emitting smoke and truck were between Jagen A3 and 36, about 2.5 km west of Bruesenwalde. About 500 meters east of these vehicles, 10 to 15 men were camouflaging a column of tanks on the read. At about 2:30 p.m., three unoccupied emplacements were at the site where the trucks had been in the morning. The imprints of the tank tracks on the read led to the east.	25X1 • <b>g</b> 25X
14.	Between 7 a.m. and 6 p.m. from 9 to 19 March, almost uninterrupted heavy artillery fire and machine gun fire was daily heard from the Himmelpfort area except for 14 March. The fire was most intensive on 12 and 13 March.	
15。	On 15 March, troops began to occupy Camp Hammelspring-Kannenburg. At 6:30 a.m., a unit of 40 to 50 trucks  and about 400 soldiers passed through Templin toward Hammelspring from the direction of Eberswalde or Prenzlau. A mortar unit of about 25 trucks towing 12 mortars of about 120 mm travelled in the same direction. On 17 March, four trucks with covered numbers occupied by enlisted men passed through Templin toward Hammelspring from the direction of Eberswalde or Prenzlau. No other troops were approaching the camp prior to the morning on 20 March.	25X 25X1 25X
1.	Comment. Movements in the area of the Neuglienicke artillery range from 7 to 16 March involved mainly columns and individual vehicles of the 12th Gds Tank Div, but also some of the 9th Gds Tank Div and army troops of the Second Mech Army. It is believed that the troops held record practices and minor local exercises. The vehicles	25X 25X 25X

ţ

SECRET 25X1 25X1 Comment. The two trains with tank units of the 18th Mech Div observed on 11 March are reported for the first time. It is believed that the units were rotated to the Schweinrich training camp for short record firing practices. The trains observed from 15 to 18 March certainly came from Schwerin. The trains observed at 3:25 p.m. on 15 March and at 8 a.m. on 16 March were probably occupied by elements of the 4th Gds Arty Brig \_\_\_\_ of the IX Mtz Rifle Corps. The train 25X1 observed on 13 March was presumably loaded with tanks of the 74th 25X1 Regt of the 94th Gds Mtz Rifle Div. The destinations of all the 26 trains observed were the Lindow, Rheinsberg, Fuerstenberg, Neustrelitz and Neubrandenburg railroad stations from where the manauvers were started. 25X1 Comment. As the shipment of troops to the maneuver area of the Third Shock 3. was not concluded before 18 March it is believed improbable that return movements to the posts should begun at the Wittstock railroad station on the same day. Official records indicated that troops entrained 25X1 in Kyritz on 21 March, when the exercises were probably completed. Comment. From 10 to 19 March. numerous troop trains and 25X1 truck columns passing through Lychen from east to vest and reversely. the 9th Gds Tank Div and army troops. Part of these units were probably rotated for record practices to the Himmelpfort area, which is the northern section of the Templin training grounds. lonnent. 25X1 the troops belonged to the 25th Tank Div On the basis of all available information this office does not believe that troops began to move to the training grounds already at this time. Although units stationed at Oranienburg during the winter moved to Vogelsang on 11 March, the units stationed at Prenzlau remained there for the time being, and the units of the 6th Gds Mech Div began leaving their posts for exercises in the Mirow area not before about 22 March.
